Novactive™

Novactive™ is the new sport cap in two parts with a hinge from Novembal.

It combines the characteristics of **hygiene**, **ergonomics** and **safety** that the consumers want.

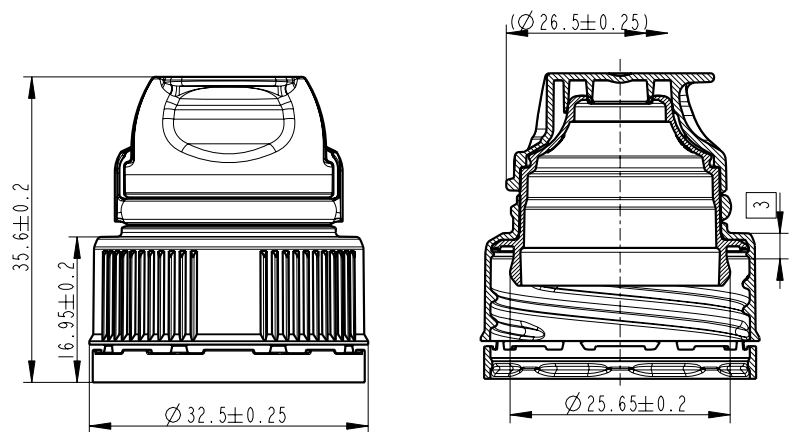

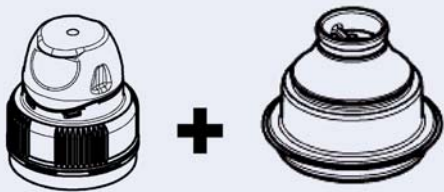

Its modern design and attractive appearance can be enhanced by the use of two different colours that offers an additional benefit for your product differentiation.

Many years of experience supplying sports caps for the flat water industry led Novembal to develop Novactive™. Novembal designed the Novactive™ to be used on aseptic lines. Changing to Novactive™ on bottling lines is easily achieved.

Design features

Material organoleptic HDPE
2 part construction
Sport cap closure with spout and hinges
Neck ring is standard 30/25 High, adaptable on low neck
No slip additive used
Sealed using an olive lip
Mono or bi color

A solution validated on line with our major European customers.

Contact our specialists to study the adaptation of your lines to this new closing solution, which is more friendly and ecological
