

Novatwist™

the move that changes everything

NOVEMBAL
a Tetra Pak company

Novemba, the innovator of wine closure solutions

Member of the Tetra Pak group of companies since 1999, Novemba produces a large range of closures using the most advanced technologies in plastic injection molding.

The Wine & Spirits Division offers a complete range of synthetic closures for wines made to be consumed shortly after bottling as well as wines destined for further aging. They are produced in our plants in North America and in Europe which are certified by:

- FDA,
- BRC/IoP,
- ISO 9001: 2000,

and are produced in accordance to environmental concerns as well as recyclability.

Global choices for wine closures

Novemba offers a complete range of synthetic closures for your wine:

- Estoril™ bar top closures
- Tage™, the first synthetic cork ever produced
- Selection™, for longer term wine preservation

Novatwist™, the new innovation, a plastic screw cap that meets the demands of the new consumer market.

Novemba is the innovator yet again in creating a top-of-the-line screw cap in response to the needs of producers and consumers.

Novatwist, Novemba's screw cap, is the new solution in closures for the wine market.

Novatwist, the new concept for wine preservation

THE SOLUTION THAT PRODUCERS ARE LOOKING FOR

Novatwist, Novemba's new screw cap, is the latest solution in top-of-the-line closures for the wine market.

Product of Novemba's experience, Novatwist was developed specifically for screw cap finish bottles BVS 30H60 and BVP 30H60.

Thanks to the material we use, the long skirt and the availability of different liners, Novatwist offers many distinct advantages:

- The capsule is a torque on closure. This technique allows a consistent bottling process.
- The concept makes it possible to stack cases and pallets.
- Different barrier liners either standard or chosen by the producers (sarenex or tin) contribute to the sealing properties. That combined with the use of neutral materials assures product stability and absence of flavor transfer.
- Ease of opening is assured by a defined, constant opening torque.
- Recyclability is maximized. Separation of the capsule from the bottle is not necessary.

THE TOP-OF-THE-LINE SCREW CAP FOR THE CONSUMER

Pleasant and easy to use, Novatwist opens and recloses very simply. No tools needed to open your wine at a moment's notice.

Novatwist gives an elegance and artistic touch to a bottle of wine. The long skirt can be personalized and creates continuity with the bottle neck. This also hides the screw lines around the top of the bottle.

Tamper-evidence is apparent to the consumer once the bottle is opened. Risk of cutting fingers on rough metal is eliminated thanks to the material we use.

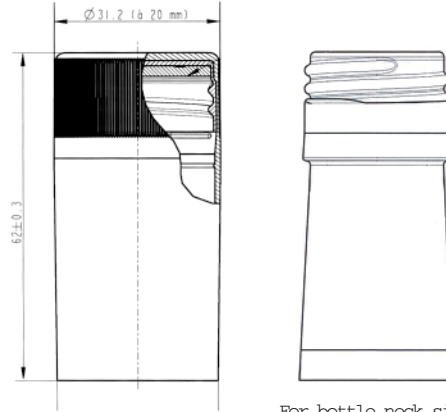

Reclosing is easy and an excellent re-seal is assured.

Features and Benefits of Novatwist:

- easy to use,
 - assures wine preservation,
 - attractive package,
- contributes to customer brand loyalty and future purchase.

Technical characteristics

- Color: 4 classic colors — black, bordeaux, gold, ivory — other colors on request, please consult your representative
- Barrier liner with film coating (saranex, tin...)
- Printing: optional, personalized logo available up to 4 colors
- Application torque: 30 to 35 inch/lbs
- Opening torque: 15 to 20 inch/lbs
- Capsule can be revenue stamped
- Only approved materials are used
- The above standards are based on closures stored in accordance with Novembal's recommendations

For bottle neck size
BVS 30H60 and BVP
